## **B195** - Infrared detector

With the aid of this circuitry it is made possible to carry out functional tests of infrared remote controls used in TV-sets and video devices, etc. Whenever there is radiation of infrared beams on the Special-Sensor, the LED will light up and indicate that the infrared remote control is operated. As accessories is available our kit "B197 | Relay card 12 V/DC". This could be connected with the Infrared Detector and it is then possible to switch through the relay contact hade up to 3.0

relay contact loads up to 3 A. Fitting case: G027N - Plastic Case approx. 72 x 50 x 35 mm

Additional kit: B197 - Relay card 12 V/DC

## Technical Data:

Operating voltage: 9 V/DC (8 - 12 V/DC) Current consumption without signal: < 200  $\mu$ A Current consumption with a signal of a IR remote control: approx. 2 - 15 mA Range between remote control and infrared detector: approx. 2 - 10 cm, depending on the remote control Function display: via a light-emitting diode Size of board: approx. 17 x 58 mm
