

## M062 - Mini-Fence-High-Voltage Generator

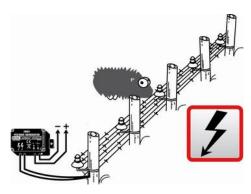

Mato Vukovic Leher Landstr. 20 27607 Geestland Germany

Kemo Electronic GmbH

http://www.kemo-electronic.de email: info@kemo-electronic.de

Produces from a battery voltage of 9 - 12 V/DC a pulsating, weak high-tension of approx. 1000 Volt. For electrically operated fences for small animals, as thief-protection etc. The two high voltage wires must be simultaneously connected to the bare feet, tongue, snout or other part of the small animal to induce electric shock.

M062
